- German – basic skills

**APPLY NOW**

## WHAT DOES A FULL STACK WEBDEVELOPER DO AT TKI

You join a **cross-functional agile team** and support the further development of our mobile solutions.

- Visualization of fiber networks in a mobile web application
- Extending the existing Azure services/functions
- Cross-platform app development with Xamarin

At TKI, web development means that you have influence on the entire **software lifecycle** – from planning, architecture, development, testing and maintenance.

With your team you develop long-lasting technical conceptions and implementations of customer specific solutions and work together with our support team in providing technical assistance for customer requests.

Some of this is new to you? No problem. Trying out **new exciting technologies**, **further educations** and **conferences**, developing yourself and the team – for these things you have free space at TKI.

## WE PROVIDE

**FLEXIBLE WORKING HOURS**

**TEAM ACTIVITIES**

**HOMEMADE FOOD FROM OUR COOK**

**JOINT DECISIONS**

**SPORTS OFFERS**

**ERGONOMIC WORKPLACE**

**LENOVO LAPTOP T-LINE**

**HOME OFFICE**

## “TKI offers the possibility to participate trainings and workshops at any time”

### What challenge did you successfully overcome at TKI?

I came to TKI as a bachelor's graduate and was immediately thrown into deep water. My first task was the implementation of a progressive web application. 3 years ago the topic was not very popular in the web world and I had to acquire a lot of knowledge by myself.

Nowadays there are different frameworks that convert a webpage into a PWA with a single push on a button and even more. Web development is a very fast evolving environment, where you always have to keep up to the times and constantly learn new techniques. But TKI offers the possibility to participate trainings and workshops at any time.

### What do you appreciate most at TKI?

There is so much about TKI that I appreciate. The free coffee, the flat hierarchies, the flexible working hours, the development opportunities and the working environment is really good. Especially we in the web department are „just“ 4 people, which gives us a certain start-up charm.

That's why I not only have development tasks, but also the coordination of customer requests, supervising projects, managing our development tickets as well as building and deploying new release versions of our WebApp.

**Edith, Webdevelopment**

### HOW LONG HAVE YOU BEEN WITH TKI, WHAT DID YOU STUDY AND WHAT IS YOUR JOB TITLE AT TKI?

I have been with TKI for 3 years now. I studied business mathematics at the TU Freiberg and then applied computer science at the TU Chemnitz. At TKI I'm working as a full-stack webdeveloper.
