

SOFTWARE TEST ENGINEER (m/f/d)

Support us in the expansion of high-performance fiber optic networks and become part of the TKI team. The familiar and relaxed atmosphere of a medium-sized company is waiting for you. We attach great importance to a mindful working environment with flexibility and individuality.

For more than 30 years we have been accompanying our customers through the entire network life cycle in the areas of consulting, planning as well as construction and operation. The expansion of the networks is realized with our own innovative software.

TASKS THAT AWAIT YOU WITH US:

- You **independently perform functional and non-functional software tests** on our in-house software, contributing your proven professional experience in this area.
- Your **creative ideas in the development of test scenarios** and test plans enrich our motivated and familiar team.
- After **recording and documenting deviations** in our ticket system, you will **supervise all adjustment steps** in close cooperation with our development team until the completion of the executed tests.
- In your daily work, you are characterized by a **high level of quality awareness** and **actively contribute to the continuous optimization** of our test processes.

WHAT YOU BRING TO THE TABLE:

- You have **successfully completed a degree in computer science** or business informatics or an apprenticeship in the field of computer science. A **certification as ISTQB Certified Tester** ideally completes your profile.
- **You are a team player and like to share your knowledge with your colleagues?** Then you fit perfectly into our team.
- You are **familiar with databases** and the terms SQL, PostgreSQL and ORACLE® are not foreign words to you.
- You **like to work in an international team** and **communicate very well in English**.

IN ADDITION, WE OFFER YOU:

30 days of vacation, an **attractive salary** and a **company pension plan** are the basis for a long-term cooperation.

In your daily work, you will benefit from our **open corporate culture** and the **uncomplicated cooperation** within the team.

To give you a good start in the team, we attach **great importance to a transparent application process** and **individual training**.

We also like to get together after work for **team and sports events**.

For an **optimal work-life balance**, you can use the **option of mobile working** and **arrange your own working hours** as far as possible.

The feel good factor at work is very important to us. That's why we offer you **ergonomic workstations with state-of-the-art technology**.

Our **inhouse cook will prepare delicious meals for you** in the TKI kitchen.
